About Mutual of Omaha's Cost-of-Care Study

The Cost-of-Care Study is based on data collected by Long-Term Care Group (LTCG), a leading provider of long-term care data. Each year, LTCG examines the cost of a variety of long-term care services, including those received at home, in an assisted living facility and in a nursing home.

In order to help people better understand what they can expect to pay for long-term care services, average costs are provided for the following:

Home Health Aide – A trained and certified health care worker who provides personal care services such as bathing and dressing in addition to light household duties like meal preparation.

Licensed Practical Nurse (LPN) – A nurse who practices under the direction of a physician and cares for people who are sick, injured, in rehabilitation or disabled. Typically, an LPN has completed two years of specialized training and has passed a licensing exam.

Registered Nurse (RN) – A specially-trained nurse who coordinates and provides patient care. RNs hold either a bachelor's degree in nursing, an associate's degree in nursing or a diploma from an approved nursing program and are licensed to practice by the state.

Assisted Living Facility – A residential living arrangement for people who may need assistance with one or more activities of daily living, but do not require the level of care provided in a nursing home. Services include laundry, meals, socialization and transportation in addition to personal care, medication management and memory care supervision and support.

Nursing Home – A licensed facility that provides 24-hour room and board, plus general nursing care and personal care assistance. Individuals who need supervision and support due to a cognitive impairment also receive care in a nursing home.

Note:

- Annual cost for home health aide is based on services received 44 hours per week, 52 weeks per year
- Annual cost for LPN and RN can be determined based on the actual number of hours services are required
- Monthly costs are calculated using daily cost, 30 days a month.
- Yearly costs are calculated using monthly cost, multiplied by 12
